-: Theme :-

"Harnessing Information Technology for Climate Action"

ABOUT US

Trans Asian Chamber of Commerce & Industry (TACCI) is a private non-profit entity promoted by ethical professionals, business persons and industrialists to provide a unique platform to bridge the gap between developed counties and developing countries to promote business, trade, commerce and industry by implementing fair business practices.

ABOUT GLOB-IT & INDUSTRY EXPO-2023

The 1st International Conference on Global Warming and Information Technology (GLOB-IT) and Industry Expo-2023 is a groundbreaking event that brings together researchers, experts, industry professionals, policymakers, and innovators from around the world to explore the intersection of global warming and information technology. This conference, along with the concurrent industry expo, aims to address the pressing challenges of climate change and promote sustainable practices through technological advancements.

GLOB-IT provides a platform for knowledge exchange, where participants can share their research findings, insights, and best practices in utilizing information technology to combat global warming. It covers various interdisciplinary topics, including climate data analysis, renewable energy technologies, environmental monitoring, sustainable computing, and more. The conference fosters collaboration, networking, and partnerships among academia, industry, and policymakers to drive innovation and formulate effective strategies for climate action ***The conference will be conducted in Hybrid mode***.

The Industry Expo, held concurrently with GLOB-IT, showcases cutting-edge technologies, products, and services from leading companies, organizations, and startups that are dedicated to addressing climate change challenges. The expo offers a unique opportunity for participants to explore market access, engage in business development activities, and establish collaborations with potential customers, investors, and strategic partners. It promotes sustainable business practices, advocates for supportive policies, and raises consumer awareness about climate-friendly solutions.

CONFERENCE TRACKS

TRACK-I: Climate Data Analysis and Modelling

- Climate change impact assessment
- Data-driven climate predictions
- Climate modelling techniques

TRACK-II: Renewable Energy Technologies

- Smart grids and energy management
- Solar, wind, and hydropower technologies
- Energy-efficient systems and buildings

TRACK-III: Environmental Monitoring and Sensing

- Remote sensing and GIS applications
- Air and water quality monitoring
- Sensor networks for climate observations

TRACK-IV: Sustainable Computing and Green IT

- Energy-efficient algorithms and architectures
- Cloud computing for climate research
- E-waste management and recycling

INTERNATIONAL ADVISORY COMMITTEE

Shri. Dan Seewooruthun,
Founder & President of the Mauritius Chapter of TACCI
Shri. Arvind RadhaKrushn,
Strategist Economic Development Board of Mauritius
Shri. Seevraj Nundllal,
